

National Conference of EMN Georgia and EMN Cyprus
**Information Campaigns as an Important Tool in
Contemporary Migration Management**

14 May 2024 Tbilisi Georgia

1. RATIONALE AND AIMS

In the context of the dynamically changing migratory movements with accompanying benefits and challenges, the need of well-set and effective information provision is growing and calling for new and modern approaches.

The contemporary governance system of migration, both at national or international level, is a complex mechanism with multi-actor actions on crosscutting multi-sector directions, which requires well-managed planning and coordination. The same goes to information campaigns that must represent various angles and provide clear messages on the most pressing issues.

Information campaigns are of different type and size. Some are for *ad-hoc* purposes, while others of permanent character but with changing goals and audiences, requiring application of individual techniques and approaches.

Such campaigns are an indispensable tool for launching of new initiatives in terms of legal migration, etc. Against this background, the event will be dedicated to the technicalities of information campaigns based on best practices and concrete results achieved. Practitioners in the field of migration policy planning, marketing and public relations will present own findings in relation to awareness-raising action and discuss challenges arising.

The other part of event will be devoted to the technical / digital solutions in delivering messages to the audience. The relevant specialists of the field will discuss the ways of better application of web-space, specialised apps and social media platforms.

Finally, promotional material, and especially the use of correct terminology in messages and explanatory notes, will be discussed. Here special attention will be given to the EMN

Glossary and its role in providing technical terminology and as an educational tool for both campaigns' target audience and those who are preparing it.

The conference will have two target groups: the new observer states and EMN members mostly representing the receiving countries.

The second day of the conference will be reserved to the members of the EMN Information Working Group (INFO WG) only (a separate agenda will be sent to the members of the EMN INFO WG along with a registration link).

2. PRACTICAL INFORMATION

- The conference will be held in **hybrid** format.
- Target audiences include **EMN NCPs, civil servants, representatives of EU, Academia, NGOs, International organisations, educational institutions.**

More information about the conference and registration link: <https://forms.gle/sU8maJA9Hoy4YccN8>

- Information for online attendance will be shared closer to the date of the conference.
